

AIP Conference Proceedings, Volume 1340
**International Workshop on Complex Structures, Integrability and
Vector Fields**

Table of Contents

Preface	1
Photograph	4
The language of mathematics	
Stancho Dimiev	5

GEOMETRY AND COMPLEX STRUCTURES

Initial value problem for the double-complex Laplace operator. eigenvalue approaches	
Lilia N. Apostolova	15
On the homology defined by the electromagnetic energy tensor	
Stoil Donev and Maria Tashkova	23
Geometry of pre-contrast functions and non-conservative estimating functions	
Masayuki Henmi and Hiroshi Matsuzoe	32

A mathematical base for fibre bundle formulation of Lagrangian quantum field theory	
Bozhidar Z. Iliev	42
A note on a homogeneous structure on an almost contact metric space	
Takashi Koda	53
Linear Weingarten surfaces in hyperbolic three-space	
Masatoshi Kokubu	58
Geometric structures in four-dimension and almost Hermitian structures	
Yasuo Matsushita	66
On some deformations of the Cassinian oval	
Ivaïlo M. Mladenov, Mariana T. Hadzhilazova, Peter A. Djondjorov, and Vassil M. Vassilev	81
Closed hypersurfaces in Riemannian manifolds whose second fundamental forms are of constant length	
Takashi Okayasu	90
Complex connections on conformal Kähler manifolds with Norden metric	
Marta Teofilova	97

INTEGRABILITY AND VECTOR FIELDS

Multicomponent nonlinear systems of Bose-Fermi fields: Exact solutions

Nikolay A. Kostov, Vladimir S. Gerdjikov, and Tihomir I. Valchev 111

Travelling waves for some generalized Boussinesq type equations

Petar Popivanov 126

An optimal system of one-dimensional symmetry Lie algebras of coupled nonlinear Schrödinger equations

Vladimir I. Pulov 134

Collision dynamics of polarized solitons in linearly coupled nonlinear Schrödinger equations

Michail D. Todorov and Christo I. Christov 144

On certain reductions of integrable equations on symmetric spaces

Tihomir I. Valchev 154

Quadratic Casimir invariants for "Universal" Lie algebra extensions

Alexandar B. Yanovski and Moses C. dos Santos 165

MECHANICS AND MATHEMATICAL PHYSICS

Two basic uncertainty relations in quantum mechanics

Andrey Angelov 183

Analytic description of the equilibrium shapes of elastic rings under uniform hydrostatic pressure

Peter A. Djondjorov, Vassil. M. Vassilev, and Ivailo M. Mladenov 189

Minimizers of Hartree type functionals and related interpolation inequalities

Hristo Genev and George Venkov 203

An approach for computing the Euclidean motions on the base of measurement data

Clementina D. Mladenova 212

Dynamical invariants and Robertson-Schrödinger correlated states of electromagnetic field in nonstationary linear media

Dimitar A. Trifonov and Andrey K. Angelov 221

Cell membranes under hydrostatic pressure subjected to micro-injection

Vassil M. Vassilev, Kostadin G. Kostadinov, Ivailo M. Mladenov, Assen A. Shulev, Georgi I. Stoilov, and Peter A. Djondjorov 234
